Profile

Peter is an experienced IT professional with a versatile background in system administration, professional services, and consulting. He specializes in GCP and Azure, excelling at automating CI/CD pipelines with modern software development practices. Committed to lifelong learning, Peter enjoys updating skillsets in emerging technologies. As a technical consultant, he focuses on driving business value through coding, automation, and cloud solutions.

Skills:
- **CI/CD:** Azure DevOps, GitLab, GitHub Actions, ArgoCD
- **IaC:** Terraform (OSS), Terraform Cloud (SaaS)
- **Secrets Management:** HashiCorp Vault Enterprise
- **CSPs:** GCP, Azure
- **Container Orchestration:** Podman, Kaniko, Kubernetes
- **Automation:** Git, Bash Scripting, Golang

Work Experience

11/2024 – present
Toronto, Canada

Senior Cloud DevOps Consultant
Blue Mantis

- Member of the Professional Services team,
- Delivering business value through code, automation, and cloud.

11/2020 – 11/2024
Toronto, Canada

Cloud Consultant
Sourced Group (An Amdocs Company)

Member of the Canadian professional services team focused in the areas of IaC, CI/CD automation, app migration, and DevOps enablement.

Project experiences included:
- **Lead GCP DevOps Engineer:** Led a six member team at a Canadian telco, managing the backlog, driving product management, leading standups, unblocking engineers, conducting architecture and PR reviews.
- **Lead HashiCorp Vault Implementation Engineer:** Led the integration of just-in-time ephemeral credential delivery for GCP service accounts within Terraform pipelines at a Canadian telco. Retrofitted existing GitLab pipeline flows with dynamic secrets injection capabilities. Implemented the injection of ephemeral credentials into HCP Terraform Cloud workspaces using the Vault API.
- **GCP Permission Automation:** Developed automation for importing existing configurations and states into a Terraform pipeline using Python for a Canadian telco, enabling IAM permission assignment for GCP tenants at scale.
- **Container Image Hardening:** Designed and implemented a container image hardening pipeline within GCP at a Canadian telco using Terraform, Docker, GitLab, and Binary Authorization.
- **Azure Enablement:** Delivered landing zone and app deployment capabilities using Terragrunt and Azure DevOps for a federal public sector client.

02/2019 – 11/2020
Toronto, Canada

Professional Services Consultant
Scalar Decisions (A CDW Company)

Member of the Professional Services team responsible for the delivery of cohesive cloud and hybrid IT solutions across diverse technology stacks.

Project experiences included:
- Terraform automation around reusable Azure transit infrastructure using Palo

Work Experience

Alto NGFW.
- Cloud readiness assessment and cost analysis on Azure.
- VMware DR from on-premises to cloud using Azure Site Recovery.
- Cloud native DRaaS using Azure and Commvault.
- NetApp Cloud Volumes on Azure.

09/2014 – 02/2019
Toronto, Canada

Technical Architect
Long View Systems
Member of the Professional Services team, with a focus on hybrid IT.

- Engaged in post-sales implementation of network, storage, compute, and virtualization infrastructure, leveraging technologies from vendors such as VMware, Nutanix, Cisco, NetApp, and EMC, with occasional Azure integration.
- Contributed to pre-sales activities, including responding to RFPs, conducting workload discovery in customer environments, designing POCs, supporting sales teams, and drafting Statements of Work (SOW).

Education

09/2005 – 08/2008
Toronto, Canada

Computer Systems Technology | 3-yr diploma
Seneca College
